SUMMARY

The proposed amendment to the Constitution amends the existing constitutional provisions which direct the division of the Commonwealth into 240 representative districts and 40 senatorial districts. It provides for a census of the inhabitants of each city and town in the Commonwealth in the year 1971 and in every tenth year thereafter. The census in 1971 is to be the basis for determining the representative and senatorial districts for the ten-year period beginning January 1, 1975. Each subsequent census shall be the basis for determining the districts for each ten-year period beginning the fourth January following each census, so that the census in 1981 will determine the districts as of January, 1985, etc.

The amendment provides that the house of representatives shall consist of two hundred and forty members and the senate of forty members. In its first regular session following each census, the Legislature shall divide the Commonwealth into two hundred and forty representative districts of contiguous territory and forty senatorial districts also of contiguous territory. Each representative district shall contain, as nearly as may be, an equal number of inhabitants according to the census. Each senatorial district shall also contain as nearly as may be an equal no of inhabitants according to the census. A representative district shall not unite two or more counties, towns, or cities, or parts thereof, or a city and a town, or parts thereof, in one district unless the same is unavoidable. Further, no town of less than six thousand inhabitants shall be divided in forming representative districts. It is also provided that the County of Dukes County and Nantucket County shall each be a representative district, notwithstanding the foregoing. The senatorial districts, each of which shall elect one senator, shall be formed without uniting two counties or parts of two or more counties, unless the same is unavoidable.

Each representative shall be an inhabitant of the district for which he is chosen at least one year immediately preceding his election, and each senator shall be an inhabitant of the district for which he is chosen at the time of his election and shall have been an inhabitant of the Commonwealth for at least five years immediately preceding his election. Any representative or senator who ceases to be an inhabitant of the Commonwealth shall cease to represent his district.

The amendment also provides that the Legislature (1) may by law limit the time within which judicial proceedings may be instituted calling in question any such division and (2) shall prescribe by law the manner of calling and conducting elections for the choice of representatives and of ascertaining their election.

Finally, the amendment annuls the existing constitutional provisions with respect to apportionment of representative and senatorial districts, although those provisions will remain in effect until January 1, 1975.

A vote was taken on the acceptance of the following resolution presented by Helen Raymond:

Whereas The 1971 Annual Town Meeting, recognizing the need for a more complete youth program in Hull, established the Hull Youth Commission; and

Whereas A survey at both the High School and Memorial School, overwhelmingly by an 80% majority, showed interest in and support for a Youth Center Lounge; and

Whereas During the month of January, when a temporary Hull Youth Center was open at the Quincy House, over 800 young people registered as members and participated in the activities; and

Whereas The Youth Commission found that the young people need, want, are willing to work for, and are capable of running a Youth Center under adult supervision; and

Whereas Time has not permitted the Youth Commission to bring to this Town Meeting a proposal for acquiring a Youth Center, which would be both reasonable for the Town and functional for a Center,

Therefore be it resolved: That the 1972 Town Meeting support the need and concept of a Hull Youth Center; and

Be it further resolved: That this 1972 Town Meeting support the efforts of the Hull Youth Commission to recommend a feasible facility for such a Center; and

Be it further resolved: That this 1972 Town Meeting respectfully request the Board of Selectmen to convene a Special Town Meeting as soon as possible after being requested to do so by the Hull Youth Commission to act on Youth Commission findings and recommendations for a permanent Hull Youth Center.

QUESTIONS

QUESTION NO. 1

PROPOSED AMENDMENT TO THE CONSTITUTION

Do you approve of the adoption of an amendment to the constitution summarized below, which was approved by the General Court in a joint session of the two branches held August 25, 1971, received 212 votes in the affirmative and 39 in the negative, and in a joint session of the two branches held June 6, 1973, received 235 votes in the affirmative and 19 in the negative?

YESNO

SUMMARY

The proposed constitutional amendment, if approved, would replace the present Article 52 of the Articles of Amendment to the Constitution of the Commonwealth and would empower the General Court, by concurrent vote of the two houses, to take a recess or recesses amounting to not more than thirty days. The present Article 52 permits such recesses but provides that "no such recess shall extend beyond the sixtieth day" from the beginning of the legislative session.

QUESTION NO. 2

PROPOSED AMENDMENT TO THE CONSTITUTION

Do you approve of the adoption of an amendment to the constitution summarized below, which was approved by the General Court in a joint session of the two branches held August 25, 1971, received 177 votes in the affirmative and 65 in the negative, and in a joint session of the two branches held June 6, 1973, received 166 votes in the affirmative and 93 in the negative?

YESNO

SUMMARY

The proposed constitutional amendment, if approved, would provide for a census in the year 1975 and every tenth year thereafter of the inhabitants of each city and town as a basis for determining the representative, senatorial and councillor districts for the ten year period beginning with the first Wednesday in the fourth January following the taking of the census, provided that the districts as established based on the 1971 census shall terminate on the first Wednesday in January, 1979. The census shall specify the number of inhabitants residing in each precinct of a town and each precinct and ward of a city.

Under the proposed amendment, the House of Representatives would consist of 160 members, in contrast to the present membership of 240, and the Senate of 40 members. The General Court would, at its first regular session after the year in which the census is taken, divide the Commonwealth into 160 representative districts and 40 senatorial districts of contiguous territory so that each representative and each senator will represent an equal number of inhabitants as nearly as may be; and such districts shall be formed, as nearly as may be, without uniting two counties or parts of two or more counties and, with respect to representative districts, without uniting, as nearly as may be, two towns or parts of two or more towns, two cities or parts of two or more cities, or a city and a town, or parts of cities and towns, into one district, and without dividing any town containing less than 2500 inhabitants.

The General Court would be permitted to pass laws to limit the time within which judicial proceedings may be instituted calling in question any such division. The proposed amendment further provides that every representative, for one year at least immediately preceding his election, shall have been an inhabitant of the district for which he is chosen, and every senator shall be an inhabitant of this Commonwealth for five years at least preceding his election and at the time of his election shall be an inhabitant of the district for which he is chosen. Every representative and senator shall cease to represent his district when he shall cease to be an inhabitant of the Commonwealth. The manner of calling and conducting the elections for representatives and for senators and councillors, and of ascertaining their election, shall be prescribed by law. The amendment vests original jurisdiction in the Supreme Judicial Court, upon petition of any voter of the Commonwealth, filed with the clerk of said court, for judicial relief relative to the establishment of House of Representatives, councillor and senatorial districts.

QUESTION NO. 3

PROPOSED AMENDMENT TO THE CONSTITUTION

Do you approve of the adoption of an amendment to the constitution summarized below, which was approved by the General Court in a joint session of the two branches held June 7, 1972, received 250 votes in the affirmative and 3 in the negative, and in a joint session of the two branches held June 6, 1973, received 253 votes in the affirmative and 0 in the negative?

YES

NO

SUMMARY

The proposed constitutional amendment would repeal section 2 of Article 46 of the Articles of Amendments to the Constitution of the Commonwealth (the "anti-aid amendment", so-called), and replace it with a new section 2, for the purpose of allowing grants in aid to private higher educational institutions or to students, or parents or guardians of students, attending such institutions.

The proposed amendment would delete the first clause of the present section 2, which requires that all moneys raised by taxation in the towns and cities for the support of public schools, and all moneys appropriated by the Commonwealth for the support of common schools shall be applied to or expended in only those schools conducted according to law under the order and superintendence of the authorities of the town or city in which the money is expended. The effect of the deletion of the first clause of section 2 would be to remove the constitutional prohibition against the use of public moneys, which have been raised by taxation or appropriated for support of public schools, for grants in aid to private higher educational institutional or to students, or parents or guardians of students, attending such institutions.

The proposed amendment would also alter the second clause of the present section 2 by removing the prohibition against a grant, appropriation or use of public money or property or loan of public credit by the commonwealth or any political subdivision for the purpose of founding, maintaining or aiding any school or institution of learning, whether under public control or otherwise, wherein any denominational doctrine is inculcated, or any other school or college which is not publicly owned and under the exclusive control, order and superintendence of public officers or public agents. In place of the foregoing, the proposed amendment would prohibit the grant, appropriation or use of public money or property or loan of credit by the Commonwealth or any political subdivision for the purpose of founding, maintaining or aiding any primary or secondary school which is not publicly owned and under the exclusive control, order and superintendence of public officers or public agents.

The proposed amendment would also add to the present section 2 a provision that nothing therein shall be construed to prohibit grants in aid to private higher educational institutions or to students, or parents or guardians of students, attending such institutions.

YES

NO

SUMMARY

The proposed constitutional amendment would revise Article 78 of the Articles of Amendment to the Constitution to permit the expenditure of money from the highway fund for mass transportation lines and other mass transportation purposes in such manner as the Legislature may direct. The highway fund includes receipts from fees, duties, excises and license taxes relating to registration, operation or use of motor vehicles and taxes from the sale of motor vehicle fuels. The expenditure of money from such fund is presently restricted to highway and bridge construction, reconstruction, maintenance and repair, enforcement of state traffic laws, and administration of the tax statutes which provide highway fund receipts.

SUMMARY

Provisions of the act establish an independent Corrupt Practices Commission, with five members to be appointed by the Governor to staggered five year terms. The Commission has subpoena powers and is to investigate, by means of secret hearings, candidates' compliance with all state and federal laws relating to political campaign contributions and expenditures and corrupt practices. If probable cause is shown, the Commission is required to direct the Attorney General to take further action in the proper form and is required to make public a report of such action. In cases involving the campaign practices of the Attorney General himself, a special attorney is to be appointed. If no probable cause is shown, the Commission is to state so publicly.

Further, the proposed act extends the application of the current statute regarding the disclosure of campaign expenditures and contributions, to all candidates for office above the town and city level, with the exception of President and Vice President of the United States. The act requires all such candidates to receive and disburse all amounts greater than \$25 by check, and makes it a crime to knowingly receive cash payment from a candidate or his committee for a service costing more than \$25. The act also requires candidates to designate a single bank as depository of funds and as recordkeeper, with records of receipts and expenditures to be open to public scrutiny.

Provisions of the act extend present campaign spending limits to cover all media expenses and require all media firms (including: television, radio, newspaper, billboard, magazine, advertising, public relations, printing, opinion polling, computer, telephone, telegraph) to report the purchase of media services by candidates. Media expenses of candidates for the offices of district attorney, clerk of court, register of probate and insolvency, register of deeds, county commissioner, county treasurer and sheriff are limited to \$.07 for each resident of the respective electoral district. Other provisions of the act require candidates, upon official announcement or filing of nomination papers, to report all political receipts and expenditures since the date of the last general election for the office sought, and count such expenditures towards spending limits. The act also limits candidates to one political committee.

The act establishes a maximum penalty of one year imprisonment and/or \$10,000.00 fine for individuals engaged in corrupt practices, and a \$50,000.00 fine for corporations so involved. In addition, the Attorney General is permitted to bring an action for the removal of a candidate whose election was materially aided by corrupt practices on the part of the candidate or one acting in his behalf, where such removal is otherwise authorized by law.

Use of the Public Sewers

Sec. 1. No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer.

Sec. 2. Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged, on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

Sec. 3. No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

- a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.
- b. Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant.
- c. Any waters or wastes having a pH lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.
- d. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ash, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc. either whole or ground by garbage grinders.

Sec. 4. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming his opinion as to the acceptability of these waters, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances prohibited are:

- a. Any liquid or vapor having a temperature higher than one hundred fifty (150)°F (65°C).
- b. Any water or waste containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150)°F (0 and 65°C).
- c. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths (3/4) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Superintendent.
- d. Any water or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.

e. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.

f. Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits which may be established by the Superintendent as necessary, after treatment of the composite sewage to meet the requirements of the State, Federal, or other public agencies or jurisdiction for such discharge to the receiving waters.

g. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.

h. Any waters or wastes having a pH in excess of 9.5.

i. Materials which exert or cause:

1. Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).

2. Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).

3. Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.

4. Unusual volume of sludge or concentration of wastes constituting "slugs" as defined herein.

j. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment process employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

Sec. 5. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 4 of this Article, and which in the judgment of the Superintendent may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

a. Reject the wastes.

b. Require pretreatment to an acceptable condition for discharge to the public sewers.

c. Require control over the quantities and rates of discharge, and/or

d. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of Section 10 of this Article.

If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent, and subject to the requirements of all applicable codes, ordinances and laws.

Sec. 6. Grease, oil, and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Superintendent, and shall be located as to be readily and easily accessible for cleaning and inspection.

Sec. 7. Where preliminary treatment or flow-equalizing facilities are provided for any water or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.

Sec. 8. When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters, and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at his expense, and, shall be maintained by him so as to be safe and accessible at all times.

Sec. 9. All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in these Rules and Regulations shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater", published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. The particular analysis involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24-hour composites of all outfalls whereas pH's are determined from periodic grab samples.

a. All industries discharging into a public sewer shall perform such monitoring of their discharges as the Superintendent and/or other duly authorized employees of the Town may reasonably

require, including installation, use and maintenance of monitoring equipment, keeping records and reporting the results of such monitoring to the Superintendent. Such records shall be made available to other Agencies having jurisdiction over discharges to the receiving waters.

Sec. 10. No statement contained in this Article shall be construed as preventing any special agreement or arrangement between the Town and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the Town for treatment, subject to payment therefor, by the industrial concern.

ARTICLE IV

Protection from Damage

Sec. 1. No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct and/or damage to property of the Town of Hull.

ARTICLE V

Powers and Authority of Inspectors

Sec. 1. The Superintendent and other duly authorized employees of the Town bearing proper credentials and identification shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling, and testing in accordance with the provisions of these Rules and Regulations. The Superintendent or his representative shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper, or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for wastes treatment.

Sec. 2. While performing the necessary work on private properties referred to in Article V, Section 1 above, the Superintendent or duly authorized employees of the Town shall observe all safety rules applicable to the premises established by the occupant or owner thereof and the occupant or owner shall be held harmless for injury or death to the Town employees and the Town shall indemnify the occupant or owner against loss or damage to its property by Town employees and against liability claims and demands for personal injury or property damage asserted against the occupant or owner and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the occupant or owner to maintain safe conditions as required in Article III, Section 8.

Sec. 3. The Superintendent and other duly authorized employees of the Town bearing proper credentials and identification shall be permitted to enter all private properties through which the Town holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair and maintenance of any portion of the sewage works lying within said easement. Whereas the Town of Hull has been annually receiving vitally needed fiscal assistance through the allocation of federal dollars under the General Revenue Sharing program; and

Whereas, these Revenue Sharing dollars are received directly from the federal government with a minimum of bureaucratic red tape which enables the Town of Hull to use revenue sharing funds to meet the locally determined priority needs of the community; and

Whereas, the citizens of the Town of Hull view their locally elected officials as being accountable for the expenditure of revenue sharing dollars, and that such clearly defined accountability has resulted in increased citizen involvement in identifying the priority needs of the community; and

Whereas the General Revenue Sharing Program is providing essential fiscal relief to the devastating impact of inflation; and

Whereas the General Revenue Sharing Program, which begin in 1972 will terminate in 1976 unless the 94th Congress authorizes an extension of the General Revenue Sharing Program in 1975;

Now, therefore, be it resolved, that the Town of Hull speaking through its locally elected Board of Selectmen, unanimously endorses the continuation of the General Revenue Sharing Program and calls upon the 94th Congress to reenact the General Revenue Sharing program in order to insure that vitally needed federal assistance will be provided to the Town of Hull.

Whereas the parcel of land commonly known as the Hall Estate is presently available for sale by the First National Bank of Boston and that said bank is willing to sell the land to the Town of Hull and,

Whereas if the land is not purchased by the Town of Hull, the bank intends to sell the land to a developer of low-cost subsidized housing and the town cannot afford the economic burden that would be

placed on it by the development of low-cost housing and,

Whereas the Town of Hull is land poor and the property represents the single largest undeveloped piece of land in the town and the town needs to expand its recreation and conservation facilities and commercial development,

Be it resolved that the Town Meeting instruct the Board of Selectmen to investigate the feasibility of acquiring the land through the use of the Federal Bureau of Outdoor Recreation program Funds, Mass. Sec. 7. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

Sec. 8. No person shall make connection of roof downspouts, exterior foundation drains, areaway drains, or other sources of surface run-off or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.

Use of the Public Sewers

Sec. 1. No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer.

Sec. 2. Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged, on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

Sec. 3. No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers.

a. Any gasoline, benzene, naptha, fuel oil, or other flammable or explosive liquid, solid, or gas.

b. Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant.

c. Any waters or wastes having a pH lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.

d. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ash, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc. either whole or ground by garbage grinders.

Sec. 4. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming his opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances prohibited are:

a. Any liquid or vapor having a temperature higher than one hundred fifty (150)°F (65°C).

b. Any water or waste containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150)°F (0 and 65°C).

c. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths (3/4) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Superintendent.

d. Any water or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.

e. Any waters containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.

f. Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits which may be established by the Superintendent as necessary, after treatment of the composite sewage to meet the requirements of the State, Federal, or other public agencies or jurisdiction for such discharge to the receiving waters.

g. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.

h. Any waters or wastes having a pH in excess of 9.5.

i. Materials which exert or cause:

1. Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).

2. Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).

3. Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.

4. Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.

j. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment process employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

Sec. 5. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 4 of this Article, and which in the judgment of the Superintendent, may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

a. Reject the wastes,

b. Require pretreatment to an acceptable condition for discharge to the public sewers,

c. Require control over the quantities and rates of discharge, and/or

d. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of Section 10 of this Article.

If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent, and subject to the requirements of all applicable codes, ordinances, and laws.

Sec. 6. Grease, oil, and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Superintendent, and shall be located as to be readily and easily accessible for cleaning and inspection.

Sec. 7. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.

Sec. 8. When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters, and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at his expense, and, shall be maintained by him so as to be safe and accessible at all times.

Sec. 9. All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in these Rules and Regulations shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. The particular analysis involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24-hour composites of all outfalls whereas pH's are determined from periodic grab samples.

a. All industries discharging into a public sewer shall perform such monitoring of their discharges as the Superintendent and/or other duly authorized employees of the Town may reasonably require, including installation, use, and maintenance of monitoring equipment, keeping records and reporting the results of such monitoring to the Superintendent. Such records shall be made available upon request by the Superintendent to other Agencies having jurisdiction over discharges to the receiving waters.

Sec. 10. No statement contained in this Article shall be construed as preventing any special agreement or arrangement between the Town and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the Town for treatment, subject to payment therefor, by the industrial concern.

ARTICLE IV

Protection from Damage

Sec. 1. No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is part of the sewage works. Sec. 3. The Superintendent and other duly authorized employees of the Town bearing proper credentials and identification shall be permitted to enter all private properties through which the Town holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. ANNUAL TOWN MEETING ADJOURNED

To May 12, 1976

A quorum being present, a legal adjourned meeting of the Inhabitants of the Town of Hull qualified to vote in Town affairs was held in the Auditorium of the Hull Memorial School, situated on Central Avenue in Hull on the twelfth day of May 1976 at 7:30 o'clock in the evening, under a warrant issued by the Selectmen dated April 13, 1976 and the following action was taken:

Voters present: 682

The meeting was called to order by the Moderator.

A voice vote was taken on the adoption of the following resolution by Albert Klein:

Be it resolved that because on Monday we started the meeting by an invocation from Father McCabe asking almighty God for his blessings and to guide us on a proper course.

And further resolved as good citizens we pledged allegiance to our flag. But last night's actions were deplorable.

And further resolved Mr. Chairman that you say let's divide the floor for a count; the floor is not divided, it is the house, the town, and a house divided against itself cannot stand.

And further resolved Mr. Chairman that there seems to be on the floor a facade of efficiency; politically motivated psychologically to create dissension and disunity.

And further resolved Mr. Chairman that last night's actions have made Hull the laughingstock of the towns around us. Four months ago the Boston Globe had an article in regard to the shantys in the town and it won't be long before we will be singing it's "only a shanty in old shanty town."

And be it further resolved Mr. Chairman, do we think for one moment that we can get a developer or developers to come into our town with such action that was generated here last night.

And further resolved please, tonight let's act intelligently to the agenda before us, united, for in unity there is strength for the betterment of the town and for ourselves.

And therefore be it further resolved that the Town Meeting here assembled, that the minority group at this town meeting not be allowed to destroy our open form of government and the voice of the people and the direction of progress.

The Moderator declared, "So voted."

A voice vote was taken on the following motion by Nathaniel J. Dushan: I wish to give notice that at the next session of this meeting, I shall offer a motion to rescind the motion passed under Article 39 on May 11, 1976, Moved as follows that the town fix the salaries of the town officers of: Moderator, Town Clerk, Selectmen, Assessors, Treasurer, tax Collector, Board of Health, Municipal Light Board, Tree Warden, and Park and Recreation Commissioners.

The Moderator declared, "It is a vote."

Be it resolved that the unprecedented, ill-advised, unheard of, and uncalled for action on Article 39 of our warrant by 171 voters on Tuesday, May 11, 1976, in abolishing the salaries of 22 Town Employees, be in no wise construed as a true reflection of the voters of this Town who number over 5000.

And be it further resolved that all action will be taken at this Town Meeting or a special town meeting to restore those salaries and to repair any false images that may be given by the press concerning the integrity and dedication of these Town Employees.

And be it also resolved that we voters of Hull duly assembled for the purposes of a Town Meeting, hereby reaffirm our faith in these and all other dedicated Town Employees.

A voice vote was taken and unanimously voted to accept the following resolution by David J. Liben:

Be it resolved that:

In order to repudiate the excesses of the last three days of Town Meeting, set straight the record, resolve our differences, and insure that no further missteps be taken, we the citizens of the Town of Hull do agree to the following:

That we are a democracy, in not just word but in deed, and that as such we are not cowards who must fear to hear both sides of an issue, nor need we silence those of opposing opinions by censure or parliamentary maneuver; that we shall remember in a democracy who is the Master and who is the Servant, and in so doing shall not allow any single individual, no matter what his position, control the outcome of any issue placed before us as a whole;

That we are not, as has been suggested on this floor, devoid of those vaulted ethics and morals which our esteemed Founding Fathers knew were essential to the people of a democracy, and let our actions, and those of our town fathers who are present here tonight, show this: by our insistence on truth, on justice, and on mutual respect for our fellow loyal citizens who may happen to hold, from time to time, opposing or minority viewpoints;

That we are not concerned with publicity, good or bad; with personal gain; with bickering and besmirchment; or with the political maneuvers that can make a mockery of these proceedings; but that instead we are concerned with one thing only: With doing what is best for our Town of Hull; for our townspeople; our public servants, our merchants, our children and our taxpayers.

Be it further resolved:

That by taking these propositions to heart we hereby affirm that we are executing to the best of our abilities our sacred trust, this government of, by, and for the people, with true dignity;

That we can hold our heads up high in the public forum, and laugh in the face of gladhanding fools who sneer at our proceedings;

And that every townsman here can be proud of himself, and of every one of our public officials, elected or appointed, who give so freely of their time and of themselves, and who ask in return only that we do not betray our trust, but rather involve ourselves in the governing of this, one of the last great strongholds of democracy, the Town of Hull in the Commonwealth of Massachusetts.

Voted unanimously.

Be it Resolved that whereas the Hull Planning Board has placed a highest priority to the dredging of Allerton bay as stated in the 1975 Annual Report and whereas the Hull Harbor Study Committee has submitted a 14-page study to the Selectmen this past winter reporting that the dredging of Allerton Harbor would have the greatest favorable economic impact on the Town, and whereas the Finance Committee has reported in the 1975 Annual Report that their main hope is our waterfront will attract motels, marinas and other recreational establishments in the future and whereas the voters of Hull appropriated \$48,000, in our 1974 Town Meeting to be used for the dredging of Windemere Channel, Allerton Harbor and the Weir River and to act on anything thereto.
